PROFESSIONAL SUMMARY

Business Analyst with 5+ years' experience bridging business needs and data-driven solutions across IT, e-commerce, and operations environments. Skilled in requirements gathering, process mapping, business case development, and stakeholder engagement, with proven ability to translate complex business problems into actionable analytical specifications. Strong technical foundation in Power BI, SQL, and data modelling enables credible conversations with both business and engineering teams. Delivered measurable outcomes including 30% reporting efficiency gain and 40% reduction in manual processing time. MSc in Computer Science (Queen Mary University of London) and IBM-certified in Data Analytics.

CORE COMPETENCIES

▪ Business Requirements Gathering & Analysis	▪ Stakeholder Engagement & Workshop Facilitation
▪ Process Mapping & As-Is / To-Be Analysis	▪ Gap Analysis & Business Case Development
▪ KPI Definition & Performance Reporting	▪ User Stories, Use Cases & Functional Specs
▪ Power BI Dashboards & Data Visualisation	▪ SQL Querying & Data Validation
▪ Data Modelling & Reporting Automation	▪ ETL Workflow Design (Talend Open Studio)
▪ Cross-Functional Collaboration & Communication	▪ Agile / Scrum Awareness & Documentation
▪ Excel (Advanced): Pivot Tables, Power Query, VBA	▪ Data Governance, Quality & Compliance

WORK EXPERIENCE

Data Analyst | IT Skills, London, UK Feb 2025 – Present

- Gathered and analysed business requirements from stakeholders across multiple departments, translating them into clear analytical specifications and KPI definitions for reporting solutions.
- Mapped end-to-end data processes (as-is and to-be), identifying inefficiencies and integration gaps; consolidated multiple online/offline data sources into a unified warehouse to improve reporting reliability.
- Designed and delivered Power BI dashboards and wireframes visualising business KPIs, increasing reporting efficiency by 30% and equipping leadership to make faster, evidence-based decisions.
- Built business cases for ETL automation in Talend Open Studio, reducing manual processing time by 40% and improving report delivery timeliness by 20% — with measurable ROI tracked against baseline.
- Partnered with cross-functional teams to facilitate continuous improvement of data-driven processes, documenting requirements, edge cases, and acceptance criteria for development handover.

Data Analyst | Skyway Internet Services, Nagaur, India Apr 2019 – Jul 2023

- Engaged stakeholders across operations, sales, and leadership to define reporting requirements and translate them into Power BI and Tableau dashboards used for strategic and operational decisions.
- Conducted competitor analysis and translated complex findings into clear, audience-appropriate stakeholder reports, improving company-wide understanding of critical performance metrics.
- Identified process inefficiencies in recurring data workflows and recommended automation solutions, reducing reporting turnaround time and minimising manual-error risk.
- Built predictive models to forecast business metrics, presenting findings to non-technical decision-makers and supporting evidence-based resource allocation.
- Defined and implemented data validation rules and quality checks, strengthening data governance and ensuring compliance with internal reporting standards.

- Acted as a bridge between technical teams and business users, increasing cross-team data literacy through tailored dashboards and documentation.

IT Technician | BSF (Border Security Force), *Delhi, India*

Apr 2016 – Jan 2019

- Operated secure communication systems and maintained transmission logs, gaining early exposure to information assurance and structured operational data handling.
- Provided IT support and trained staff on new systems, improving operational efficiency — first experience translating technical capability into user adoption.

KEY PROJECTS

NorthStar Living — UK Retail Performance Dashboard — *Power BI · DAX · SQL*

- Engaged with mock stakeholders to define retail performance KPIs; delivered an interactive Power BI dashboard enabling category, regional, and time-period analysis with dynamic filters for executive review.

GitHub: [NorthStar-Living-UK-Retail-Performance-Dashboard](#)

HR Attrition Analysis Dashboard — *Power BI · DAX*

- Defined HR reporting requirements and built an interactive dashboard surfacing attrition drivers and workforce trends, enabling HR teams to identify risk factors and prioritise retention initiatives.

GitHub: [hr-attrition-analysis-powerbi](#)

Harbour Home — Dispatch & Returns Analysis (UK E-Commerce) — *Python · Pandas · SQL*

- End-to-end analysis of dispatch delays and returns for a UK e-commerce business; identified root-cause inefficiencies and delivered recommendations to reduce return rates and improve operational KPIs.

GitHub: [harbour-home-dispatch-returns-analysis](#)

Movie Dataset ETL Pipeline — *Talend Open Studio · SQL*

- Designed and implemented an end-to-end ETL pipeline, documenting source-to-target mappings and transformation logic — directly mirroring the artefacts a BA would hand over for development.

EDUCATION

MSc Computer Science (Internet of Things & Future Networks)

Sep 2023 – Sep 2024

Queen Mary University of London, UK

BSc Information Technology

Sep 2012 – Jun 2015

Sabarmati University, Gujarat, India
