PROFESSIONAL SUMMARY

Aspiring Data Scientist with an MSc in Computer Science from Queen Mary University of London and 5+ years' hands-on experience in data analysis, predictive modelling, and statistical problem-solving. Skilled in Python (Pandas, NumPy, Scikit-learn, XGBoost), SQL, and the end-to-end ML workflow — from data cleaning and feature engineering through model training, hyperparameter tuning, and evaluation. Portfolio includes classification models achieving 98% accuracy (cancer detection) and 91.4% cross-validation accuracy (wine quality), plus an MSc dissertation applying ML to sensor data in healthcare. Strong communicator able to translate complex analytical findings into business-relevant insights.

TECHNICAL SKILLS

▪ Languages	Python, SQL, R (basic)
▪ ML & Modelling	Scikit-learn, XGBoost, Random Forest, SVM, Decision Trees, GridSearchCV, Cross-Validation
▪ Data Analysis	Pandas, NumPy, Feature Engineering, EDA, PCA, Statistical Testing
▪ Visualisation	Matplotlib, Seaborn, Power BI (DAX), Tableau
▪ Databases & ETL	SQL (Complex Queries, Optimisation), MySQL, Talend Open Studio
▪ Deep Learning	TensorFlow / Keras basics (ANN, CNN, RNN — academic exposure)
▪ Tools & Platforms	Jupyter, Git/GitHub, VS Code, AWS, Google Cloud, Databricks (exposure)
▪ Workflow	Data Cleaning, Model Evaluation, Hyperparameter Tuning, Stakeholder Reporting

EDUCATION

MSc Computer Science (Internet of Things & Future Networks)

Sep 2023 – Sep 2024

Queen Mary University of London, UK

Dissertation: "GaitSync" — applied machine learning to gyroscope sensor data to classify gait patterns for rehabilitation and movement-abnormality detection. **Relevant modules:** Machine Learning, Data Analytics, Big Data Processing, Cloud Computing, Advanced Algorithms.

BSc Information Technology

Sep 2012 – Jun 2015

Sabarmati University, Gujarat, India

DATA SCIENCE & MACHINE LEARNING PROJECTS

Cancer Detection Model — Python · XGBoost · Decision Trees · Scikit-learn

- Built and evaluated ensemble classification models for cancer detection, achieving 98% prediction accuracy through model comparison, cross-validation, and hyperparameter tuning.
- Performed exploratory data analysis and feature selection to identify the most predictive biomarkers; addressed class imbalance using stratified sampling.

GitHub: [cancer-prediction-ml](#)

Wine Quality Classification — Python · Random Forest · SVM · GridSearchCV · Scikit-learn

- Built classification models (Random Forest + SVM) predicting wine quality from chemical properties; achieved 91.4% cross-validation accuracy via GridSearchCV hyperparameter tuning.
- Conducted comparative analysis of model performance using precision, recall, and F1-score to justify final model selection.

GitHub: [Wine-Quality-Classification-using-Machine-Learning](#)

GaitSync — Gait Analysis using ML (MSc Dissertation) — Python · Scikit-learn · Gyroscope Sensor Data

- Applied machine learning to gyroscope sensor time-series data to classify gait patterns for rehabilitation and movement-abnormality detection in healthcare settings.

- End-to-end pipeline: signal preprocessing, feature extraction from sensor windows, model training, and evaluation against clinically labelled data.

GitHub: [gaitsync-gait-analysis-ml](#)

Tesla Stock Market Analysis & Prediction — *Python · XGBoost · Pandas · Matplotlib · Scikit-learn*

- End-to-end financial time-series project: data cleaning, exploratory analysis, feature engineering (lag features, rolling statistics), and trend visualisation on Tesla (TSLA) data.
- Built an XGBoost prediction model to forecast price movements, demonstrating applied ML on real financial data.

GitHub: [Stock-Market-Analysis-Prediction-Tesla-TSLA](#)

Harbour Home — Dispatch & Returns Analysis — *Python · Pandas · Matplotlib · SQL*

- End-to-end analysis of dispatch delays and returns for a UK e-commerce business; identified statistical root causes of operational inefficiencies and quantified return rate drivers.

GitHub: [harbour-home-dispatch-returns-analysis](#)

WORK EXPERIENCE

Data Analyst | IT Skills, *London, UK*

Feb 2025 – Present

- Apply Python and SQL to extract, clean, and analyse large datasets, generating insights that support data-driven business decisions.
- Build statistical analyses and exploratory data analysis (EDA) outputs to identify patterns and trends across operational data.
- Automate data pipelines using Talend Open Studio, reducing manual processing time by 40% and improving data quality for downstream analytics.
- Develop Power BI dashboards visualising KPIs and analytical findings, increasing reporting efficiency by 30% and enabling stakeholders to act on data insights.
- Collaborate with cross-functional teams to translate business questions into analytical problems, building reproducible workflows for recurring analyses.

Data Analyst | Skyway Internet Services, *Nagaur, India*

Apr 2019 – Jul 2023

- Built and deployed predictive models in Python to forecast key business metrics, enabling evidence-based strategic planning and resource allocation.
- Applied statistical techniques to large operational datasets using SQL and Python, surfacing performance trends that drove measurable improvements in business outcomes.
- Implemented automated data validation and quality checks, rapidly identifying discrepancies and strengthening dataset reliability for modelling.
- Conducted competitor and market analysis, translating complex statistical findings into clear insights for non-technical stakeholders.
- Developed dashboards in Power BI and Tableau to communicate analytical outputs and improve cross-team data literacy.

IT Technician | BSF (Border Security Force), *Delhi, India*

Apr 2016 – Jan 2019

- Operated secure communication systems and maintained transmission logs, gaining early exposure to structured data handling and information assurance.
- Provided IT technical support and staff training on new systems, improving operational efficiency.
