

JUMMA MOHAMMAD TELI

Power BI Developer | DAX | Power Query (M) | Data Modelling | SQL
Birmingham, UK | jummamohammad477@gmail.com | +44 7442 001088
[linkedin.com/in/jumma-mohammad](https://www.linkedin.com/in/jumma-mohammad) | github.com/jumma786

PROFESSIONAL SUMMARY

Power BI Developer with 5+ years' experience designing and delivering interactive Power BI dashboards, semantic data models, and DAX-driven KPI reporting solutions across IT, e-commerce, and operations environments. Skilled in Power Query (M) transformations, star-schema data modelling, and the full Power BI development lifecycle from requirements gathering and wireframing through publication and stakeholder enablement. Strong SQL foundation underpins clean, performant source data. Proven outcomes include a 30% increase in reporting efficiency and a 40% reduction in manual processing time through pipeline automation. MSc in Computer Science (Queen Mary University of London) and IBM-certified in Data Visualisation.

TECHNICAL SKILLS

▪ Power BI Desktop	Interactive Dashboards, Wireframing, Visual Design, Drill-through, Bookmarks, Tooltips
▪ DAX	Measures, Calculated Columns, Time Intelligence, Filter Context, CALCULATE, SUMX, FILTER
▪ Power Query / M	Data Cleansing, Merges, Appends, Pivot/Unpivot, Custom Columns, Parameterisation
▪ Data Modelling	Star Schema, Snowflake, Relationships, Cardinality, Role-Playing Dimensions
▪ SQL	Complex Queries, Joins, CTEs, Aggregations, Views — source layer for Power BI models
▪ Power BI Service	Publishing, Workspaces, Scheduled Refresh, Sharing (exposure to RLS & gateways)
▪ Other BI Tools	Tableau, Cognos — dashboard development & operational reporting
▪ Supporting Stack	Excel (Advanced, Power Query, VBA), Python (Pandas) for data prep, Talend Open Studio
▪ Methodology	Requirements Gathering, KPI Definition, Wireframing, Stakeholder Demos, Documentation

WORK EXPERIENCE

Power BI Developer / Data Analyst | IT Skills, London, UK

Feb 2025 – Present

- Designed, developed, and maintained interactive Power BI dashboards and wireframes visualising business KPIs and project metrics, increasing reporting efficiency by 30% and supporting executive decision-making.
- Built DAX measures (time intelligence, filter context manipulation, CALCULATE patterns) to power KPI calculations, period-over-period comparisons, and dynamic drill-throughs across dashboards.
- Modelled source data into star-schema layouts in Power BI, defining relationships, cardinality, and role-playing dimensions to support performant, scalable reporting.
- Used Power Query (M) to cleanse, merge, and reshape data from multiple online and offline sources, parameterising queries for reusability across reports.
- Wrote and optimised SQL queries feeding the Power BI semantic layer, ensuring high data accuracy and consistency for downstream visuals.
- Automated upstream ETL workflows in Talend Open Studio, reducing manual processing time by 40% and improving report delivery timeliness by 20% — freeing Power BI development time for value-add work.

Data Analyst & BI Developer | Skyway Internet Services, Nagaur, India

Apr 2019 – Jul 2023

- Developed Power BI and Tableau dashboards visualising operational and competitor KPIs for non-technical stakeholders, improving cross-team data literacy and reducing ad-hoc reporting requests.
- Gathered reporting requirements from stakeholders across operations, sales, and leadership, translating them into KPI definitions, wireframes, and dashboard layouts.
- Built DAX measures and Power Query transformations to support recurring management reporting cycles (daily, weekly, monthly).
- Wrote SQL queries against large operational datasets to feed reporting layers, applying joins and aggregations to surface business performance trends.
- Implemented validation rules and quality checks across the reporting pipeline, strengthening dataset reliability and supporting data governance standards.

IT Technician | BSF (Border Security Force), *Delhi, India*

Apr 2016 – Jan 2019

- Operated secure communication systems and maintained transmission logs, gaining early exposure to structured operational data handling.
- Provided IT technical support and trained staff on new systems, improving operational efficiency across the unit.

KEY PROJECTS

NorthStar Living — UK Retail Performance Dashboard — *Power BI · DAX · Power Query · SQL*

- Built an end-to-end Power BI dashboard reporting retail performance across product categories, regions, and time periods; designed the star-schema data model, DAX measures for sales KPIs and period comparisons, and dynamic KPI filters supporting executive review.

GitHub: [NorthStar-Living-UK-Retail-Performance-Dashboard](#)

HR Attrition Analysis Dashboard — *Power BI · DAX · Power Query*

- Developed an interactive Power BI dashboard analysing employee attrition rates and workforce trends across demographic and tenure dimensions, with DAX measures supporting risk segmentation and Power Query transformations cleansing HR source data.

GitHub: [hr-attrition-analysis-powerbi](#)

Harbour Home — Dispatch & Returns Analysis (UK E-Commerce) — *SQL · Python · Reporting*

- Analysed dispatch delays and returns for a UK e-commerce business, surfacing root-cause patterns and quantifying return rate drivers — directly translatable to Power BI dashboards.

GitHub: [harbour-home-dispatch-returns-analysis](#)

Movie Dataset ETL Pipeline — *Talend Open Studio · SQL*

- Built an end-to-end ETL pipeline feeding cleansed, conformed data into a reporting-ready schema — the upstream foundation that makes Power BI semantic models reliable and performant.

GitHub: [movie-etl-talend](#)

EDUCATION

MSc Computer Science (Internet of Things & Future Networks)

Sep 2023 – Sep 2024

Queen Mary University of London, UK

BSc Information Technology

Sep 2012 – Jun 2015

Sabarmati University, Gujarat, India
