PROFESSIONAL SUMMARY

SQL Developer with 5+ years' experience writing, optimising, and maintaining SQL across large operational datasets in IT, e-commerce, and operations environments. Specialist in complex query design, data validation, ETL pipeline development, and data warehouse integration, with proven ability to reduce manual processing time by 40% and improve report delivery by 20% through automation and query tuning. Strong foundation in relational data modelling, MySQL, and tools including Talend Open Studio and Snowflake, supported by Power BI for downstream reporting. MSc in Computer Science (Queen Mary University of London) and IBM-certified in Data Analytics.

TECHNICAL SKILLS

▪ SQL	Complex Queries, Joins, CTEs, Window Functions, Subqueries, Aggregations, Query Optimisation
▪ Databases	MySQL, Snowflake; relational schema design and normalisation
▪ Data Modelling	Star/Snowflake Schemas, Data Warehousing, Source-to-Target Mapping
▪ ETL / ELT	Talend Open Studio, SQL Scripting, Data Validation & Cleansing Pipelines
▪ Data Quality	Validation Rules, Quality Checks, Reconciliation, Data Governance
▪ BI & Reporting	Power BI (DAX, Power Query), Tableau, Cognos
▪ Programming	Python (Pandas, NumPy) for data processing; VBA
▪ Tools & Cloud	Git/GitHub, Excel (Advanced), AWS, Google Cloud, Databricks (exposure)
▪ Methodology	Process Mapping, Requirements Gathering, Reporting Automation

WORK EXPERIENCE

Data Analyst (SQL Focus) | IT Skills, London, UK

Feb 2025 – Present

- Wrote and optimised complex SQL queries (joins, CTEs, subqueries, aggregations) for data validation, cleansing, and extraction across large datasets, ensuring high accuracy for downstream reporting.
- Designed and integrated multiple online and offline data sources into a unified data warehouse, mapping end-to-end source-to-target flows to improve reporting reliability and cross-team accessibility.
- Built and automated ETL workflows in Talend Open Studio using SQL transformations, reducing manual data processing time by 40%, eliminating recurring data quality errors, and improving report delivery timeliness by 20%.
- Implemented validation rules and reconciliation checks at multiple stages of the data pipeline, improving overall data quality and reducing downstream defects.
- Developed Power BI dashboards on top of SQL-modelled data, translating business requirements into KPI views and increasing reporting efficiency by 30%.

Data Analyst (SQL & Reporting) | Skyway Internet Services, Nagaur, India

Apr 2019 – Jul 2023

- Wrote performance-sensitive SQL queries against large operational datasets, applying joins, aggregations, and statistical techniques to surface business performance trends.
- Designed and maintained recurring data processing pipelines using SQL, reducing reporting turnaround time and minimising the risk of manual errors.
- Implemented data validation rules and quality checks at the database layer, rapidly identifying and resolving discrepancies to strengthen dataset reliability.

- Built Power BI and Tableau dashboards on top of SQL-modelled data, communicating insights to non-technical stakeholders and improving cross-team data literacy.
- Supported data governance practices by enforcing consistency and accuracy standards across reporting datasets.

IT Technician | BSF (Border Security Force), *Delhi, India*
Apr 2016 – Jan 2019

- Operated secure communication systems and maintained transmission logs, gaining early exposure to structured operational data handling and information assurance.
- Provided IT technical support and trained staff on new systems, improving operational efficiency across the unit.

KEY PROJECTS

Movie Dataset ETL Pipeline — *Talend Open Studio · SQL*

- Designed and implemented an end-to-end ETL pipeline extracting from source, applying SQL-based transformations (cleansing, lookups, aggregations), and loading to a target schema — mirroring real-world data engineering workflows.
- Documented source-to-target mappings, transformation logic, and validation rules for reproducibility and handover.

GitHub: [movie-etl-talend](#)

NorthStar Living — UK Retail Performance Dashboard — *SQL · Power BI · DAX*

- Built the underlying data model and SQL queries powering an interactive Power BI dashboard across product categories, regions, and time periods; tuned queries to support dynamic KPI filters with responsive performance.

GitHub: [NorthStar-Living-UK-Retail-Performance-Dashboard](#)

Harbour Home — Dispatch & Returns Analysis (UK E-Commerce) — *SQL · Python · Pandas*

- Wrote SQL queries against e-commerce operational data to analyse dispatch delays and product returns; identified root-cause patterns in operational inefficiencies and quantified return rate drivers.

GitHub: [harbour-home-dispatch-returns-analysis](#)

HR Attrition Analysis Dashboard — *SQL · Power BI · DAX*

- Modelled HR data and wrote SQL aggregations powering an interactive Power BI dashboard analysing attrition rates and workforce trends across demographic and tenure dimensions.

EDUCATION

MSc Computer Science (Internet of Things & Future Networks)
Sep 2023 – Sep 2024

Queen Mary University of London, UK

BSc Information Technology
Sep 2012 – Jun 2015

Sabarmati University, Gujarat, India
