

JUMMA MOHAMMAD TELI

Data Analyst | BI & Dashboards | SQL | Power BI | Python
Birmingham, UK | jummamohammad477@gmail.com | +44 7442 001088
[linkedin.com/in/jumma-mohammad](https://www.linkedin.com/in/jumma-mohammad) | github.com/jumma786

PROFESSIONAL SUMMARY

Data Analyst with 5+ years' experience turning complex datasets into clear, decision-ready insight. Specialist in Power BI dashboard development, SQL data modelling, and ETL automation, with a proven record of improving reporting efficiency by 30% and reducing manual processing time by 40%. MSc Computer Science graduate (Queen Mary University of London) and IBM-certified in Data Analytics and Data Visualisation. Confident communicating with both technical teams and non-technical stakeholders to deliver scalable, governance-aligned reporting solutions.

CORE SKILLS

▪ Power BI (DAX, Power Query, Interactive Dashboards)	▪ SQL: Complex Queries, Joins, CTEs, Query Optimisation
▪ Data Modelling, Star/Snowflake Schemas, Data Warehousing	▪ ETL/ELT Pipelines (Talend Open Studio, SQL Scripting)
▪ Python (Pandas, NumPy, Matplotlib) for Data Analysis	▪ Excel (Advanced): Pivot Tables, Power Query, VBA
▪ Tableau, Cognos — KPI Reporting & Visualisation	▪ Statistical Analysis & Predictive Modelling (Scikit-learn)
▪ Stakeholder Engagement & Requirements Gathering	▪ Data Governance, Validation & Quality Assurance
▪ Process Mapping & Reporting Automation	▪ Cloud Exposure: AWS, Google Cloud, Databricks

WORK EXPERIENCE

Data Analyst | IT Skills, London, UK

Feb 2025 – Present

- Built and maintained interactive Power BI dashboards visualising KPIs and project metrics across departments, increasing reporting efficiency by 30% and enabling faster executive decision-making.
- Wrote and optimised complex SQL queries for data validation, cleansing, and extraction across large datasets, ensuring 99%+ accuracy for downstream reporting.
- Designed and implemented end-to-end data process mapping, integrating multiple online and offline sources into a unified data warehouse to improve reporting reliability and cross-team accessibility.
- Automated ETL workflows in Talend Open Studio, reducing manual data processing time by 40%, eliminating recurring data quality errors, and improving report delivery timeliness by 20%.
- Translated business requirements into analytical specifications by partnering with cross-functional stakeholders, supporting continuous improvement of data-driven processes.

Data Analyst | Skyway Internet Services, Nagaur, India

Apr 2019 – Jul 2023

- Analysed large operational datasets using SQL and statistical techniques, surfacing performance trends that drove measurable improvements in business outcomes.
- Developed Power BI and Tableau dashboards to communicate KPIs to non-technical stakeholders, improving cross-team data literacy and reducing ad-hoc reporting requests.
- Built predictive models to forecast key business metrics, enabling evidence-based resource allocation and strategic planning.
- Implemented data validation rules and automated quality checks, rapidly identifying and resolving data discrepancies to strengthen dataset reliability.
- Automated recurring data processing pipelines, cutting reporting turnaround time and minimising manual-entry errors.
- Supported data governance practices, ensuring consistency, accuracy, and compliance with organisational reporting standards.

- Operated and maintained secure radio communication systems, ensuring reliable transmission of sensitive operational data.
- Implemented data backup and security procedures and maintained detailed transmission logs to safeguard critical information assets.
- Provided IT technical support and trained staff on new systems, improving operational efficiency across the unit.

KEY PROJECTS

NorthStar Living — UK Retail Performance Dashboard — *Power BI · DAX · SQL*

- Built an interactive Power BI dashboard analysing retail performance across product categories, regions, and time periods, with dynamic KPI filters supporting stakeholder reporting and executive review.

GitHub: [NorthStar-Living-UK-Retail-Performance-Dashboard](#)

HR Attrition Analysis Dashboard — *Power BI · DAX*

- Developed an interactive Power BI dashboard analysing employee attrition rates and workforce trends, enabling HR teams to identify risk factors and improve retention strategies.

GitHub: [hr-attrition-analysis-powerbi](#)

Harbour Home — Dispatch & Returns Analysis (UK E-Commerce) — *Python · Pandas · SQL*

- Performed end-to-end analysis of dispatch delays and product returns for a UK e-commerce business, identifying root causes of operational inefficiencies and delivering actionable insights to reduce return rates.

GitHub: [harbour-home-dispatch-returns-analysis](#)

Movie Dataset ETL Pipeline — *Talend Open Studio · SQL*

- Designed and implemented a full ETL pipeline using Talend Open Studio to extract, transform, and load movie dataset records, mirroring real-world data engineering workflows.

GitHub: [movie-etl-talend](#)

Tesla Stock Market Analysis & Prediction — *Python · XGBoost · Pandas · Scikit-learn*

- Conducted end-to-end analysis on Tesla (TSLA) stock data including cleaning, exploratory analysis, feature engineering, and trend visualisation; built an ML model to forecast price movements.

GitHub: [Stock-Market-Analysis-Prediction-Tesla-TSLA](#)

GaitSync — Gait Analysis using Machine Learning (MSc Dissertation) — *Python · Scikit-learn · Sensor Data*

- MSc dissertation using gyroscope sensor data and machine learning to analyse gait patterns for rehabilitation and movement-abnormality detection in healthcare settings.

GitHub: [gaitsync-gait-analysis-ml](#)

EDUCATION

MSc Computer Science (Internet of Things & Future Networks)

Sep 2023 – Sep 2024

Queen Mary University of London, UK

BSc Information Technology

Sep 2012 – Jun 2015

Sabarmati University, Gujarat, India
